

Stand with the States!

Planned Parenthood®

A Message from Gwyneth Paltrow and Blythe Danner

Dear XXXXXXXX ,

Why are two Hollywood actors contacting you today?

Because we are first and foremost a mother and daughter, and we cannot stand idly by as birth control, family planning, and basic health care come under attack.

We are deeply disturbed by what's happening in South Dakota and by the growing movement to limit women's reproductive rights. And as Mother's Day approaches, we join Planned Parenthood in their fight to protect women in South Dakota and across the country.

Our family was recently blessed with the arrival of a new member. As we jump into another round of tiny clothes, new expressions, and dirty diapers, it strikes us yet again: having a child changes your life forever.

Such a personal decision should be made by families, not by politicians.

We need common-sense solutions to the health issues we face throughout our lives. Planned Parenthood provides those solutions, helping millions of women each day, improving our communities and our families. **That's why we support this amazing organization. We hope you will, too.**

Sincerely,

Blythe Danner and Gwyneth Paltrow
On behalf of Planned Parenthood Federation of America
