## Factoids:

A suit by Anel L. alleged that she underwent an abortion by Gandotra at El Norte Clinica Medica on May 4, 1991.

Gandotra botched her abortion, resulting in hospitalization, and debilitating and permanent injuries. Anel won a \$50,000 judgment, but was unable to collect.

A woman named Alicia alleged that she was 18 weeks pregnant when she went to Gandotra for an abortion. Gandotra had her sign a consent form for first-trimester abortion. Alicia suffered an incomplete abortion that required emergency surgery. When questioned by medical board investigators about Alicia's case, Gandotra stated "I guess I just screwed up."

On December 8, 1994, Gandotra killed Magdalena Ortega Rodriguez during a horrifically botched abortion at 30 weeks gestation. Gandotra fled the country fearing murder charges. There is still a valid no-bail arrest warrant for Gandotra in San Diego County. (See above)
