Hey all – just wanted to let you all know before it goes public – so, please keep it hush hush until after November 18th when the ND State Board of Medical Examiners meets to finalize things – but our doctor in question is a fully licensed physician in the state of ND and there are NO conditions on her license – WHEW! I've attached a PDF if you care to see the absolutely beautiful specimen that is on the state website. This pretty much made my month 😊😊. We are pretty happy around here & doing some happy dances!
