

Archive of Abortion Patient Deaths

May we never forget the toll in human tragedy that abortion inflicts on mother and child.

Maintained by Operation Rescue
Updated September 2024

Documented Maternal Patient Deaths from Abortion

This is a permanent historic archive of reports produced by Operation Rescue related to documented cases of abortion-related maternal deaths. In many cases, Operation Rescue was the primary source that uncovered the abortion patient death, researched and reported on it, and filed complaints against those abortionists and facilities responsible.

The actual number of maternal deaths from abortion are unknown, due to inadequate reporting and the fact that the Abortion Cartel goes to great lengths to cover them up so they can pretend to the public that their grisly business is “safe and legal.” We know better.

The Abortion Cartel wants us to forget these women ever existed, or that their deaths are acceptable losses. We reject both those notions. May we never forget the toll in human tragedy abortion inflicts on women, their babies, and society in general, and may that memory urge us on in our work to protect human lives until abortion has ended for good.

The incidents with informative hyperlinks (in blue text) are listed from most recent to least recent by year of death.

Melissa L. Heim, 2001 (14 Years Old)

- Melissa died January 26, 2001, of respiratory and cardiac arrest following an abortion on January 22, 2001. The abortion staff allegedly failed to perform appropriate and timely cardiopulmonary resuscitation. Emergency medical services resuscitated her, but she suffered severe brain damage and died four days later. According to documents, she was 14 years old.
